Law Firms of the Future

UK Legaltech Mission to Portugal 2019

Avvoka https://avvoka.com/
We offer an end-to-end contract automation, live-negotiation and analytics platform for busy legal and commercial teams. Users can automate their contracts without the requirement to "code" them. We work with law firms and in-house legal teams, including Allen & Overy, Baker McKenzie, McDonald's, Warner Media and Novartis.

BigHand www.bighand.com
We offer voice, workflow and document production software. BigHand Dictate is a leading digital dictation software, BigHand Now provides detailed operational data, BigHand Quantum gives unique financial data and BigHand Evaluate offers unrivalled specific profitability data. Over 2,500 law firms use our technology.

Cognitiv+ www.cognitivplus.com
We offer an artificial intelligence platform enabling legal insights from your data. Founded in London in 2015, we extract contractual obligations and risks, monitor contracts and trigger alerts when action is required, saving time from professionals and minimising unpleasant surprises. Our app will be in Spanish and Portuguese.

Genie AI www.genieai.co
We are the only artificially intelligent legal editor, where drafting, negotiating and review can happen all in one place. Our product, SuperDrafter, uses machine learning to predict the legal language relevant for each deal. We are completing pilots with large law firms and our product is ready to scale across languages and countries.

Juralio www.juralio.com
A collaboration platform focused on the particular needs of complex legal projects. At the moment, lawyers mainly use documents and email for collaboration. Juralio enables the activity of legal matters to be visualised and interacted with in a simple, intuitive way. Uses include disputes, investigations and transactions.

LawPanel www.lawpanel.com
We offer a modern, open and collaborative platform for managing IP portfolios. It is designed for busy professionals, to empower forward-thinking IP practices to work easily, quickly and efficiently without clunky work tools. We use data and algorithms to automate routine tasks and increase productivity and responsiveness.

Legatics www.legatics.com
An intelligent deal platform that provides a more efficient and transparent method of running legal transactions. Parties can upload documents, leave comments and view the status of a deal in real time. We have experience in 20 markets worldwide. The Portuguese law firm Morais Leitão adopted Legatics in July 2019.

LPA www.visirule.co.uk
Logic Programming Associates Ltd (LPA) is the developer of VisiRule, an easy to use graphical tool which can capture complex legal knowledge and generate interactive expert advice systems. Our software enables lawyers to visually construct executable decision trees with their own knowledge and machine learning.

Luminance www.luminance.com
Lawyers around the world now rely on this AI platform to dig deeper into their data, providing unprecedented insight and clarity across their contracts. Our software understand legal wording regardless of language, jurisdiction or specialism. Over 15 customers across the Iberian Peninsula, including Uría Menéndez and Roca Junyent.

Nuix www.nuix.com
We are a global risk, compliance, and security software company, helping law firms and legal teams solve complex data, investigation and eDiscovery challenges. Our partners and customers include Uría Menéndez, KPMG, Deloitte, PWC, the Spanish Tax Authority, the Portugese Competition Authority, BBVA and Santander Bank.
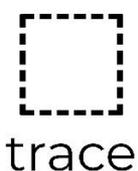

Scissero www.scissero.com
A cloud-based legal AI platform that can read, draft, and mark up legal agreements to a standard that is (almost) indistinguishable from human lawyers. Whether you are a bank, corporate or law firm, let Scissero assist you in negotiating routine contracts. We have clients in the UK, US, Ireland and Germany.

The Link App www.thelinkapp.co.uk
A platform built by lawyers for lawyers to communicate with clients, allowing real time two way communication, secure document transfer, call-back requests and case progression tracking. We offer a desktop application for law firms and a free mobile app and web portal for their clients, encrypted as UK banking apps.

Trace https://trace.ventures/
We offer software as a service (SaaS) and professional services, helping your company protect, visualise and find personal data, automate GDPR compliance documentation, and stay on top of privacy risk. Our software helps organisations locate, visualise and protect the data that matters, highlighting legal gaps.
